LAB EXPERIMENT

1. Perform basic Image Handling and processing operations on the image is to read an image in python and Convert an Image to Gray-scale.

Code:

```
import os
import cv2
import matplotlib.pyplot as plt
print("Current folder:", os.getcwd())
print("Files in folder:", os.listdir())
image_path = r"C:\Users\VIPIN
BABURAJ\OneDrive\Documents\computer vision\scenary.jpg.jpg"
img = cv2.imread(image_path)
if img is None:
    print("Image not found. Check the path above.")
else:
    print("Image loaded successfully!")

    gray = cv2.cvtColor(img, cv2.COLOR_BGR2GRAY)

    plt.figure(figsize=(10, 5))

    plt.subplot(1, 2, 1)
    plt.imshow(cv2.cvtColor(img, cv2.COLOR_BGR2RGB))
    plt.title("Original Image")
    plt.axis("off")

    plt.subplot(1, 2, 2)
    plt.imshow(gray, cmap="gray")
    plt.title("Grayscale Image")
    plt.axis("off")

    plt.show()
```
