LAB EXPERIMENT

2. Perform basic Image Handling and processing operations on the image is to read an image in python and Convert an Image to Blur using Gaussian Blur

Code:

```
import cv2
import matplotlib.pyplot as plt

# Read the image
img = cv2.imread("scenary.jpg.jpg")

# Check whether the image is loaded
if img is None:
    print("Image not found. Check the file name!")
else:
    # Apply Gaussian Blur
    blur_img = cv2.GaussianBlur(img, (15, 15), 0)

    # Convert BGR to RGB for display
    img_rgb = cv2.cvtColor(img, cv2.COLOR_BGR2RGB)
    blur_rgb = cv2.cvtColor(blur_img, cv2.COLOR_BGR2RGB)

    # Display original and blurred images
    plt.figure(figsize=(10, 5))

    plt.subplot(1, 2, 1)
    plt.imshow(img_rgb)
    plt.title("Original Image")
    plt.axis("off")

    plt.subplot(1, 2, 2)
    plt.imshow(blur_rgb)
    plt.title("Gaussian Blurred Image")
    plt.axis("off")

    plt.show()
```
